Dear Sir/Maam,

I am writing to express my interest in the Frontend Developer position in your company. As a Magna Cum Laude graduate in Information Technology from the University of Cebu – Banilad Campus, I am eager to contribute my technical skills, problem-solving abilities, and passion for software development to your team.

Throughout my academic and internship experience, I have worked on multiple projects involving frontend and full-stack development, mobile applications, and project management systems. I currently work as a Software Engineer/Frontend Developer, where I contribute to building scalable and efficient applications. Previously, I completed internships as a FullStack Developer and Quality Assurance Intern, which strengthened my understanding of software development lifecycles, testing practices, and collaborative workflows.

I am proficient in technologies such as Angular, React, JavaScript, Java, Kotlin, Python, MySQL, Firebase, and Google Cloud Platform. I also have experience with RESTful APIs, Docker, Agile methodologies, and modern development tools including GitHub, Postman, and Figma. Some of the projects I have contributed to include inventory tracking systems, project management platforms, booking systems, and internal component libraries designed to improve development efficiency.

Beyond technical skills, I value teamwork, leadership, and continuous learning. My experience serving as Treasurer and Finance Volunteer for the Philippine Society of Information Technology Students helped me develop strong organizational, communication, and leadership skills that I carry into professional environments.

I am excited about the opportunity to contribute to your company and further grow as a developer within your organization. I would welcome the opportunity to discuss how my background, skills, and enthusiasm align with your team's goals.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,
Dean Lourence P. Barquio
